

# Grants transaction data with GL distribution details

This report details the grants module transactions that have been posted to a selected range of GL codes in a specified period. It will show for each transaction its source as well as the debit and credit entries where relevant. Due to the volume of data, it is best to run this report straight into excel.

Navigation: Team content > Live > School > Departmental (Shared) Reports > Grants Reporting > **Other**

## Run Options

Select:

- Dates required
- Department code
- **Optionally**, any GL code segments

(Most grant transactions when mapped to the GL, use a cost centre code starting with the two letter department code followed by AG e.g. XXAG. All debit Source of Funds for Grants start with MA, to indicate source is research.)

Example output of report

Grants data with GL distribution details
