Appendix A: Expenditure accruals

At the end of any month there might be some costs that you know you have incurred but for which you haven’t yet received (or logged onto UFS) the invoice.

**Example:**
- An engineer comes to the Department in the middle of July and repairs a machine.
- You know that he is going to charge you £1,500 for the work but you won’t get his invoice until the end of August.
- However, that repair actually took place in July and should therefore be included in the accounts for July.

This is more significant at year end when it is important to get the repair cost in the right accounting year.

The costs are allocated to the correct year by means of a General Ledger journal. This journal is then reversed out in the following month/year so that when the invoice is logged onto UFS and paid in the normal way, you don't have a double charge to your department account.

**How to raise the accrual journal**

1. Log into UFS in the normal way and go into your department GL responsibility.
2. Select **Journals → Enter**.
3. Click on the **New Batch** button and complete the header details in the normal way.
4. Click on the **Journals** button and start to enter the accrual journal for July
   a) **Period**: should be **JUL-20** at this year end
   b) **Category**: select **Auto Reversal** from the list of values
      
      The auto-reverse function should only be used when it is appropriate for the journal to be reversed in the next period. When it is not appropriate to reverse the journal in the next period the journal should be entered in the normal way and manually reversed in the appropriate period.
   c) **Description**: enter as appropriate
   d) **Control Total**: enter as appropriate
5. Account codes to be used:
   
<table>
<thead>
<tr>
<th>Debit</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Department code</td>
<td>As normal</td>
</tr>
<tr>
<td>Cost Centre</td>
<td>As normal</td>
</tr>
<tr>
<td>Source of Funds</td>
<td>As normal</td>
</tr>
<tr>
<td>Transaction code</td>
<td>Appropriate to the expenditure being accrued</td>
</tr>
<tr>
<td></td>
<td><strong>VBAK</strong> (accrual)</td>
</tr>
</tbody>
</table>
6. **Save** your journal
Post the journal

From the Navigator screen choose Journals > Post. Enter the batch name to recall the journal and tick the box to select it for posting. Behind the scenes, a second (reversing) journal will be created in the next period and will be automatically posted by the Finance Division.

If the journal category Accrual or Adjustment is used, then you must remember to manually reverse it in the AUG-20 period, using the More Actions button, and to post both journals.

In your accounts...

The accrual journal debits (or charges) expenditure - in place of the absent invoice. The credit entry goes to the VBAK balance sheet code, representing a liability for the goods/services received but not yet invoiced.

The reversal journal creates a credit against the original expenditure transaction code (e.g. EMZZ from the screen shot above). This in turn is cancelled out by a corresponding debit balance when the supplier's invoice is finally received and processed on UFS in the normal way.

**Example:**

- Current financial year:
  - 29-Jul-2020 Create journal to accrue expenditure £1,500
  - (No invoice received but expenditure is charged to correct year)
- New Financial Year:
  - 1-Aug-2020 Journal reverses automatically (£1,500)
  - 20-Aug-2020 Invoice for repairs is entered in AUG-19 £1,500

**Effect on expenditure in the new year**

<table>
<thead>
<tr>

**FAQs**

Does it matter if I have already raised a purchase order for the goods/services in July?  
No

Should I include the VAT element of the goods/service in the accrued total?  
Yes

What if the invoice is still not received in August?  
*Then the accrual journal must be repeated in August. It will reverse in September when, hopefully, the invoice will be entered on UFS*
